General information about Fair and Panel Discussion

3D virtual trade fair in which **Futurasmus**, **15 manufacturers** from all over the world, the **KNX International Association** and **KNX Spain** will present novelties in KNX products and applications.

Manufacturers and visitors will interact through their avatars (respectively tagged) in an attractive virtual environment that will allow us to "meet", talk, exchange documentation, consult doubts to the manufacturer in their booth, etc., both as a group and in private. Almost like a traditional face-to-face fair.

During the **roundtables**, discussions will be held on very interesting and current topics, commented on by manufacturers, KNXA members and experienced integrators.

We also encourage all **attendees to participate** and give their feedback!

Also very interesting is **the brief presentation on the ETS6** with first-hand information from Vassilios Lourdas (Head of Tools of the KNXA).

In addition, as in face-to-face fairs, there **will be** special prices, sweepstakes, games, the possibility **to register to be ETS6 BETA-tester**, etc..

Invitations and access to the fair

Access is free of charge for all KNX professionals and students, who can register by clicking **here** (deadline: May 4)

On May 4th (at the latest) an email will be **sent to all attendees with the platform access link** and brief instructions. Now you can create your avatar and test the virtual environment of the fair...

May 5 - Program

Opening time	9:30	GMT +2
Trade Fair	10:00 to 16:00	
Panel discussion (in Spanish)	10:00 to 12:00
